

CONGRESS CUTS OUT HONOLULU

First Section of Honolulu Harbor
Extension Probably Will Be
Provided For

(Associated Press by Federal Wireless.)
WASHINGTON, January 27.—The New York harbor project for the canal has been eliminated from the rivers and harbors appropriation bill for this session, the committee having decided not to include any new projects in the measure because of the limited financial resources in view of the vastly increased demands upon the treasury for reconstruction, carries a total of approximately \$14,000,000.

HONOLULU HARBOR EXTENSION FAVORED

This week's mail brought to Honolulu the official reports of Brig. Gen. Dan C. Kingman, chief of engineers, U. S. A., on the Honolulu harbor extension project, with his recommendation. The report made by him to the war department was accompanied by a revised map of the western end of the harbor, showing the areas recommended by dredging, now and as a continuing project.

Yesterday's press despatches from Washington state that the rivers and harbors committee had voted not to include any new projects in this year's bill, but the extension of the Honolulu harbor is probably not among the items thrown out. The despatches refer specifically to the decision not to include the New York harbor extension project, with his recommendation. The report made by him to the war department was accompanied by a revised map of the western end of the harbor, showing the areas recommended by dredging, now and as a continuing project.

Yesterday's press despatches from Washington state that the rivers and harbors committee had voted not to include any new projects in this year's bill, but the extension of the Honolulu harbor is probably not among the items thrown out. The despatches refer specifically to the decision not to include the New York harbor extension project, with his recommendation. The report made by him to the war department was accompanied by a revised map of the western end of the harbor, showing the areas recommended by dredging, now and as a continuing project.

According to General Kingman's letter to the war department, the late Colonel Brownell submitted two proposals. Each contemplated a channel 800 feet wide and thirty-five feet deep through the "Honoiki" channel, from Honolulu harbor to the Kapalama basin, the essential difference between the proposals being that one contemplated a wider entrance than the other. The estimates were \$1,535,000 and \$1,729,000, respectively.

General Kingman, "that a section only 1000 feet in length should be immediately provided to meet present needs, leaving the remainder to be completed when required. The estimated cost of the proposed 1000-foot section, under project No. 1, is \$450,000." This project, the chief of engineers recommends, saying: "An initial appropriation of \$200,000 should be made, with contract authorization to the amount of the balance, \$250,000. It is further recommended that authority be given for the purchase or construction of a government-owned dredge, if suitably priced for the work cannot be secured."

LOWER COAST CITIES WANT HAWAIIAN TRADE

Los Angeles and San Diego Plan
For Commerce

Los Angeles and San Diego have entered the field for the cream of trade with these islands, hitherto held securely by San Francisco. A committee has been appointed to handle work at once, following the reading of a trade report by L. N. Brunswick, to the foreign trade committee of the Los Angeles chamber of commerce.

L. D. Sale of the Western Wholesale Drug company was named as the head of the committee. The committee includes: Solomons, president of the Schiff-Lang Company, merchant brokers; Douglas White, industrial agent of the Salt Lake Route; C. S. Hutton, sales manager of the Union Lithograph Company, and Frank Simpson, fruit shipper.

With the establishment of direct service to Honolulu by the Great Northern Pacific Steamship Company, stated Mr. Brunswick, who visited these islands as the representative of the chamber of commerce on the maiden voyage of the Great Northern, "Los Angeles is in position to contend on equal terms with San Francisco for the rich traffic of the islands."

B. FRANK HOLLINGER WILL MEET OLYMPICS

Supervisor B. Frank Hollinger will leave for the Big Island in the Mauna Kea Saturday and upon the arrival of the Great Northern at Hilo will take the Olympic Club baseball team in charge and escort them to Honolulu arriving here Tuesday morning. Hollinger will give the boys many valuable pointers and spread himself in making the welcome to the Winged G boys a gala one.

CURE THAT COUGH

When you have a troublesome cough, it does not mean that you have consumption or that you are going to have it, but it does mean that your lungs are threatened, and it is just as well to be on the safe side and take Chamberlain's Cough Remedy before it is too late. For sale by all dealers. Benson, Smith & Co., Ltd., agents for Hawaii.

Songbirds May Be Imported To Isle of Oahu

Denver Publisher Makes Generous
Offer To Stock Every Valley
With Feathered Warblers

ROBIN REDBREASTS, the glorious meadowbird of the Sunny South, the Bluebird for Luck, harbingers of Spring, and the perky meadowlark, that splendid songstress, may soon all be residents of Oahu, if the offer being made by P. G. Bonfils, owner of the Denver Post, and a man who has almost adopted Honolulu as his winter home, is accepted by the powers that be.

Mr. Bonfils, who is here with Mrs. Bonfils and their daughter, believes that there are no places on earth like Hawaii, despite the grouchy which has appeared in his home paper from the pen of one of his employees. But he misses the birds and the music of the feathered songstresses of the air. "As he intends to visit here frequently, he is willing to remedy the almost birdless state of affairs that he finds, and his offer is now before the board on agriculture and forestry."

Will Finance Feathered Invasion
The Denver publisher offers to land in Honolulu, without cost to anyone but himself, enough robins, bluebirds, meadowlarks and meadowlarks to stock every valley. His idea is to bring the birds here and to turn them loose.

Just what the authorities will say to the generous offer remains to be seen. Hawaii has learned through bitter experience to beware of anything that comes from the mainland. The importation of birds is a question which local ornithologists and others have long pondered over. It is likewise a question whether the mongoose would allow the meadowlark, a ground-nesting bird, to live and multiply. The robin is a town bird and he would be safe, while the bluebird nests in tree cavities and post-holes and would also be mongoose proof. The meadowlark is a tree bird and would probably escape.

It is safe to say that the general public will be in hearty accord with any suggestion of accepting Mr. Bonfils' generosity. What the canny scientists may say is another story.

PORTO RICAN COUPLE INJURED IN EXPLOSION

Bodies Peppared With Grit When
Detonating Cap Goes Off

Amelia Pacheco and Philippe Pacheco were brought to the emergency hospital from Punaola yesterday, suffering from the effects of an exploding detonating cap.

On Tuesday night the Porto Ricans were cleaning up their yard and made a bonfire of the rubbish. The fire was blazing merrily and the Pachecos were warming themselves at the generous glow, when, bang! something exploded and both of them were knocked off their feet.

When they picked themselves up they found that their anatomies were pretty well peppered with grit, tiny pebbles and pieces of metal. Amelia Pacheco sustained a wound inside an eye and may lose the sight of that optic.

Dr. R. G. Ayer dressed the injuries of the Pachecos and yesterday afternoon they were sent back to Punaola, Portuola, Maui, covered by bandages. Portuola, Maui, covered by bandages. Portuola, Maui, covered by bandages.

GOVERNOR APPROVES AND SIGNS DOCUMENTS

Governor Pinkham yesterday approved and signed documents relating to public lands and holders of such, as follows:

Mortgages—Henry L. Sauer and wife to the Hawaiian National Bank of Honolulu, Maui, land covered by land patent (grant) No. 1018, Emil J. Puk, to P. C. Beamer, and Paul F. Lada to the First National Bank of Waialua, lot No. 41, Kaupukahu, Maui.

Transfers—Mamuel Asia to Pia Cockett, lot No. 59, Waihohekeke, Kula, Maui, and Minnie Fehado to Mary Lopez, lots Nos. 12 and 115, Manawaloape, North Hilo, Hawaii.

Permission was given to Alexander Steel to sell a right of way to the County of Kauai over lot No. 57, Kapua Homestead tract, First Series, Kauai.

The Governor also approved and signed a quitclaim deed to the Board of the Hawaiian Ecological Association for a portion of school Grant No. 28, Arana 6, in Halawa, Island of Molokai.

Rainfall Was Real Deluge Tuesday Night

Records of Weather Bureau Show
Last Torrent To Have Been
Worst of Storms

ONE and thirty-four hundredths inches of rain fell in Honolulu during the forty minutes between eleven and eleven-thirty on Tuesday night, as recorded at the United States weather bureau in the Alexander Young building. From eight o'clock Tuesday night to eight o'clock yesterday morning the rainfall recorded by Meteorologist Hamrick reached one and seventy-eight hundredths inches, and was the heaviest precipitation recorded here. The rain moderated somewhat, however, in intensity from eight yesterday morning to eight o'clock last night, when only sixty-nine hundredths of an inch fell.

"From the first of January, this year, to date," said Mr. Hamrick last night, "we had a total of 18.04 inches of rain. The greatest amount of rain we have had in such a short period of time can be easily appreciated when it is known that the average rainfall recorded at this station during the last eleven years has been only 23.80 inches a year."

Record Rainfall Since Christmas
"Since last Christmas Eve to date, this station has recorded a total of 26.63 inches, or 2.83 inches more for a month than the average for each of the past eleven years. If we go back a little further we find that the rain fell recorded at this station since November 1, last year, to date, that is, eight o'clock Wednesday night, or practically two months and twenty-six days, amounts to 37.73 inches, or 13.94 inches more for this comparatively short period than the average we have during each of the past eleven years."

"Now, as to the wind. At nine thirty-five this morning (Wednesday) the wind was blowing at the rate of fifty-four miles an hour, from the south. At this time, eight o'clock in the evening, the barometer is rising slowly and shows indications of going up gradually. The wind is moderating greatly and during the twelve hours from midnight Tuesday to noon today the average wind velocity is about twenty miles an hour. During the afternoon the wind has been very moderate, averaging from seven to ten miles an hour."

Damage Done Tuesday Night
Tuesday night's late downpour was general over the central portion of Honolulu, but out Kaimuki-way it was very light and the roads were not raging streams as were the streets in the main city. The concrete forms just finished by city laborers for the work of repairing the Maikiki flume were swept away and conditions there returned to what they had been previously, when the storm of last week broke and demolished the flume.

As the result of Tuesday night's heavy rains more than anything else probably, the drill tower, which rose to a height of sixty-five feet, fell in the rear of the central fire station. It had already been condemned as useless and dangerous, but was left standing, however. In its fall it escaped hitting anything but the length of the alley way which it chose for a temporary resting place. No damage was done to anything but the very rotten timber of the tower itself.

LAO VALLEY SPANISH ORPHANS CARED FOR

Spanish Consul Reports On What
Is Being Done For Them

Senor Luis Guillen Gil, the Spanish consul who has returned from a visit to Maui, where he looked into the condition of his countrymen who suffered in the recent disastrous Lao Valley storm and which resulted in the loss of fourteen persons, half of whom were Spaniards, reports that Maui families are caring for several of the children who are now orphans.

Editor Will J. Cooper of the Maui News of Wailuku, and Mrs. Cooper have taken the little four-year-old Fernandez girl. The second Fernandez orphan has been taken into the home of Capt. and Mrs. O. J. Whitehead of Wailuku, and the third child has found a home with Mr. and Mrs. Daniel H. Case of the same city. The parents of these children, Cirilo Fernandez and his wife, were drowned, as was one of their children. The child who survived was spending the night at the home of a friend and, because they had been unable to return to their home on account of the rain, escaped the fate that overwhelmed their parents and the other little one.

Of the Juan Roman Madronal family only one child escaped a watery grave. Madronal, his wife and two children were drowned. A Spanish family has taken the surviving child, but Senor Gil hopes that some kindly family in Honolulu will relieve the Maui Spanish family of the added burden. They are poor and barely able to care for their own.

Each of the four Spanish children, whose parents died in the raging torrents of the Lao River, has been given \$100 by the Wailuku Sugar Company, through Senator H. B. Penhallow, its manager, reports the Spanish consul. The money has been placed in charge of Senor Gil and will be invested where it will draw interest and accumulate. When the children attain the majority, which in Spain is at twenty-three years of age, there should be a neat sum coming to each of them.

CORONER'S JURY SHY A CORPSE

One Was On Inquest Job But
Other Had To Be 'Hunted
Up'

(Mail Special to The Advertiser.)
HANALEI, Kauai, January 25.—

A coroner's jury, empaneled here this morning to investigate the death of a Korean, whose body had been pulled out of the Hanalei River, and the death of a Japanese laborer, whose rumor stated had been killed in a camp row, discovered that it was shy one corpse. The jury went to the Japanese camp and indignantly viewed a dead body found there, taking for granted that it was the Japanese who had been killed, but the body bore no evidence of violence. Failing over this, the jury proceeded to look for the body of the Korean, last reported as being laid out on the river bank.

Careful searching of all likely places failed to disclose any Korean, dead or alive. The jury then expanded its search before the puzzled jurors and the perplexed coroner.

Then it was discovered that after the Korean's body had been left on the river bank to die some Japanese had come along and carried it into their camp. The presence of the body in the camp led to the reports of a Japanese killing.

The jurors rendered a verdict of suicide in the case of the Korean, Kim Seon, the evidence showing that he had deliberately jumped into the flooded river and had made no attempt to save himself.

JARDEN ISLAND GETS SHARE OF THE STORM

LIHUE, January 25.—After about five days of clear weather, heavy rain are again falling on Kauai and a decided drop in the temperature has taken place.

On Monday afternoon the showers began and by evening had settled into a steady downpour.

All night the rain continued with greater or less force and at times a heavy wind blew with great velocity. Over three inches of rain fell during the night in Lihue and the rest of the district averaged about the same. A light, but very steady rain has continued all Tuesday with no evidence of letting up. About five o'clock heavier rain fell and probably an unusually large amount will fall during the night.

SONS OF HONOLULU ARE OUT IN FRONT

Word coming from New Haven seems to indicate that this year's Yale water polo team may well be called a Hawaiian team. There are four Honolulu boys who have won a position on the team. Horace von Holt, son of Harry M. von Holt of this city, is captain of the team, and when it comes to a scrap in the water he has no equal. He played in the Yale-Princeton football game in November, and his football training has put him in prime condition for water polo. Harry Steiner will be on the team for his fourth year, and is a veteran at the game. Last year he was considered the best forward on any of the Eastern college teams, and was placed on the All-American team. Jack and Carter Galt, the two athletic sons of John R. Galt, are inexperienced, but strong players. Jack is a forward, while Carter will probably play goal. The latter will be Yale's defensive strength, for his two hundred and twenty pounds, ability to handle himself in the water, and strength will prevent any forward from getting through him for a goal.

Last year De Witt Alexander was on Yale's swimming team, which was intercollegiate, but a painful accident to his shoulder will keep him out of the tank for some time to come.

Other Hawaiian boys whose swimming ability has made them prominent college athletes are Farrant Turner and Ralph Gray. Farrant Turner is captain of the Wesleyan swimming team, and a fast man in the short distances. At Cornell Ralph Gray is making a name for himself, and is putting into practice at Ithaca what he learned at Waikiki.

There is also talk of a revival of the marathon between Honolulu and Haliwa. Two very successful races were held over this course a few years ago, and the finish in each case as witnessed by an immense concourse of spectators.

It is expected that Mayor Lane will start the championship walk on February 20. The majority of the races of the past have been started by the mayor and an effort will be made to secure his presence at the starting line this year.

The judges of the walk will probably be divided into two sections, each of which will have an automobile at their disposal. One lot will keep their eyes on the fast division which always opens up a gap before the course has been a quarter covered, while the others will keep cases on the rearward of the walkers.

The judges will patrol the mauka side of the avenue, on which the constabulary will walk, as other vehicles traffic being allowed on this side of the road. This arrangement has been in vogue during the past two races and by it the work of the judges is greatly facilitated.

Enquiries have been received as to the definition of a novice, and they have doubtless been prompted by the fact that a special prize is offered for the first novice to finish. A novice in the present case is a walker who has never taken part in a previous Kalakaua avenue walking race.

Entries close at the store of E. O. Hall & Son on February 19, at noon, an entry fee of fifty cents being required for each race. This money goes to defray the expenses of the meet, and to help the expenses of the meet, and to help the expenses of the meet.

The races to be contested are as follows: ninth annual Kalakaua avenue walk; walks for bonafide fat men and veterans of 50 years and over; running race and bicycle race. All races will start at the corner of King street and Kalakaua avenue and finish at Heihei's Tavern.

With a gang of men working on the double-quick putting the racetrack at Kaplani Park in the right kind of condition for dirt track automobile and motorcycle races and Eddie Waterman announcing that he will promote a series of automobile and motorcycle races Saturday afternoon, February 26, sportdom received a nice little surprise package yesterday.

The big show Waterman will give the public of Honolulu is to be the annual of automobile and motorcycle racing in the Territory and with his experience in building dirt tracks, and his keen knowledge of what makes a clever auto pilot, Honoluluans and Carnival visitors are in line to witness something out of the ordinary in the sporting line. Several years ago an attempt was made to hold an around-the-island auto race, but the affair fell flat through poor management and lack of experience on the part of those who proposed the event.

Waterman's meet will be different. First of all Kaplani Park will be put in the same condition as is the track at Fresno, Bakersfield and Corona, where accidents were few and far between, and none but experienced, cool and collected men who know how were at the wheel. Following the mapping out of the plans for the building of the track, Waterman began arranging for the cars to be used in the meet. One of these cars will be a Maxwell, built especially for Barney Oldfield, and which was used by him in the Vanderbilt Cup and Grand Prix races at the Panama-Pacific Exposition and at Corona and Venice, the last two events being won by Oldfield. Another car coming with the Maxwell is the Matson which left San Francisco yesterday afternoon, and which will be one long remembered by the people of this city.

Waterman's meet will be different. First of all Kaplani Park will be put in the same condition as is the track at Fresno, Bakersfield and Corona, where accidents were few and far between, and none but experienced, cool and collected men who know how were at the wheel. Following the mapping out of the plans for the building of the track, Waterman began arranging for the cars to be used in the meet. One of these cars will be a Maxwell, built especially for Barney Oldfield, and which was used by him in the Vanderbilt Cup and Grand Prix races at the Panama-Pacific Exposition and at Corona and Venice, the last two events being won by Oldfield. Another car coming with the Maxwell is the Matson which left San Francisco yesterday afternoon, and which will be one long remembered by the people of this city.
